

12 Dec 1979

Dear Triton Owner,

You are one of a favored few to receive a draft of the first chapters of the new "Improvement Bulletin". The final version will be printed by the National Triton Association, a copy being sent to every Triton Owner in the Association.

Please sit down with the draft and a sheet of blank paper and start reading. As you come to something that can be improved, note the subject of your comments and then write them down.

The sheet of "Notes for Rewriting" is a compilation of some improvements suggested by some NETA members at our last meeting. The suggestions of the group who got to look over the drafts were so good that we felt that we should get more people into the act. These drafts are therefore going to all NETA members, other NTA fleets, NTA officers and many boat owners who have been particularly helpful in offering constructive suggestions.

There will be a second mailing of the final chapters which will be sent to those who have made contributions to the enclosed drafts within three weeks of postmark.

The Improvement Bulletin is meant to serve as a standard reference to all NTA members. It and the "Trumpet" are the only aids that NTA offers owners not belonging to local fleets. Let's make this as useful as the first Improvement Bulletin was!

Thanks for your help.
